1.2. WBS Dictionary

1	Project Management	
1.1	Dudget Management	Dispuing managing and trading future over anger
1.1	Budget Management	Planning, managing and tracking future expenses.
1.2	Risk Management	Evaluation of risks and identification of procedures to minimize its impact on the project.
1.3	Change Management	Planning the activities for ensure a beneficial transition to the system.
1.4	Communication Management	Planning, monitoring, and revision of all the channels of communication with the stakeholders.
1.4.1	Stakeholders Analysis	Identification, classification and analysis of all the stakeholders.
1.5	Team Building & Procurament Management	Planning of all procurament and recruiting of the development team.
1.5.1	Interviews Management	Human research activity related to the individuation of the development team members.
2	Danisha was na Cashanin a	
2	Requirement Gathering	
2.1	Requirements Elicitation	Planning extraction, inspection and elaboration of all the requirements.
2.1.1	Workshops With Stakeholders Planning	Planning the activity with the stakeholders to achieve the most complete set of requirements.
2.2	Ux Interaction Design	Identification, analysis and development of clear guidelines for the Ux interaction development.
2.3	Prototype Realization	Realization of a tangible object to provoke the coming out of hidden requirements.
2.3.1	Puppet App Development	Realization of a stubbed GUI only version of the Apps, with a rail-constrained experience.
2.4	Prototype Submission	Planning and management of activities related to the puppet App test with the stakeholders.
2.5	Requirements Review	Reshaping of the requirements in light of what got from 2.4 and expert's analysis.
2.0	requirements nevien	neonapmy of the requirements in highe of what got from 211 and experts analysis.
3	Analysis & Design	
3.1	Requirements Analysis	Analysis of what got from the point 2 to achieve a formal description of the user's needs.
3.1.1	RASD Release	Realization of the document to describe the system in terms of possible uses and requirements.
3.2	System Design	Analysis of the RASD to achieve a consistent, detailed and technical description of the system.
3.2.1	DD Release	Realization of the document with aspects and functionalities of the system-to-be.
3.3	Critical Review	Planning of meetings with field experts to revise and fix the RASD and the DD.
3.4	Dev Plan Management	Planning of the two development phases.
4	Back End Development	
4.1	Database Setup	Managing the selection, acquisition and setup operations of the Database as a service.
4.2	Functions Implementation	Managing of the development of all the operations required to get a functional system server.
